

## How to run and use Junkware Removal Tool - JRT

- Junkware Removal Tool is a security utility that searches for and removes common adware, toolbars, and potentially unwanted programs (PUPs) from your computer.
- JRT Download Link: <http://www.bleepingcomputer.com/download/junkware-removal-tool/>
- Once it is downloaded, Run it.
- It will show you disclaimer.

- Press any key to continue.
- When you start the process, it will create a registry backup.

- Once backup is complete, it will go in and check Startup, Modules, Processes, Services, Files, Folders, Registry, installed browsers and event viewer logs.
- It does a quick and deep scan on registry. It is the longest step in the process.
- Make sure all browsers are closed when you run this process.
- It can take any time depending upon the size of hard disk and speed of computer.

- During the scan desktop disappears. It closes the desktop and reopens it. Don't worry about it.
